

Summer Camps

Yes, we can make those video games and hobbies educational!

Do you want your child to stay engaged over the summer and keep learning?

Try
**STEMs For Youth
Summer Camps!**

Does your child want to have fun this summer?

This summer your PK-12th grader can transform from consumer to creator by learning new skills and having fun! Based on the class, various academics are covered in a fun engaging way, including: coding, reading comprehension, essay writing, design, problem solving, critical thinking, engineering, etc. All classes allow students to make new friends as they master new skills and explore new concepts.

Almost all jobs in the future will require some technology knowledge. Help us help your child succeed in school and in life! **We provide individual equipment for each child, so spots fill up quickly!**

Grades PK-3
