Income Tax Analysis
  o The team discussed nuances/exceptions regarding what is included in retirement income for the State of Ohio and decided to maintain language that is specific to social security retirement income being excluded from both traditional income tax and earned income tax.
  o Adding additional language under the conclusions section regarding how earned income tax takes a smaller percentage of a retiree’s income than a traditional income tax.
  o Discussed table summarizing some key differences between a Traditional Income Tax and an Earned Income tax.
  o Drafting language on how most schools within the state of Ohio differ from LCSD. Running the numbers to show not only the percentage of revenue that comes from the business community in school districts that utilize an income tax as a source of revenue from those that don’t, but also to look at the differences within those districts that utilize a tax between those that employ a traditional vs those that use an earned income tax. We should also list where LCSD stands vs all other schools in the state of Ohio in terms of the percentage of revenue coming from the business community.
  o As the Wyoming school district has an income tax, it was suggested that we try to reach out to someone there. It was mentioned the principal from one of our schools came from Wyoming. If so, does anyone have a relationship with him and can ask him more about his experiences with it there?

Extra-Curricular School Activities Analysis
  o Drafting an Executive summary for the report
  o Follow-up with Brian Conatser for verification of the revised athletic numbers
